

SAP TM

Best-in-class solution for holistic transportation management

Transports are the biggest cost drivers in logistics.

In times of rising costs and increasing environmental sensitivity, transportation management is becoming even more important. Companies are well advised to establish transportation management systems that optimally support them in planning and controlling. SAP Transportation Management (TM) is a worldwide leading application that enables you to manage all the tasks of customer-oriented and cost-optimised transport logistics. This includes everything from order management, transport planning and scheduling, operational transport monitoring and invoicing up to the provision of key performance indicators for analysing and controlling your processes.

SAP TM - Variants

SAP offers SAP TM in the Basic and Extended variants. SAP TM Basic is included in the SAP S/4HANA licence and largely corresponds to the SAP LE-TRA (Logistics Execution Transportation) scope of services. SAP TM Extended is the solution for more complex transportation management tasks.

With K.Motion S/BET (Basic Extended Transportation), Körber offers an add-on for companies whose main task is transport planning and freight cost processing for road transport. K.Motion S/BET extends the SAP TM Basic scope of services and is aimed at companies that plan and carry out truck transports.

SAP TM with Körber - Advantages at a glance

- **High competence**
in the areas of process control and technology through successful projects realized since 2006
- **Implementation of end-to-end processes**
connected to SAP ERP ECC and/or SAP S/4HANA and integrating SAP EWM, SAP YL, SAP BN4L, GTS, EHS
- **Methodical Best Practices**
for project implementation, the creation of templates and the execution of rollouts
- **Add-ons and Best Practices**
to extend the SAP TM scope of services (shipment tracking, framework route planning, dangerous goods management, ...)

"The collaboration was goal-oriented and the Körber team responded quickly. In addition, there was good conceptual work, very good specialist knowledge and an understanding of the process that produced practicable solutions"

Margaret Vogl
Global Supply Chain Logistics at BSH Hausgeräte GmbH

SAP TM - Highlights at a glance

- Application for shippers and forwarders
- Planning your own vehicle fleet and transports for execution by transport service providers
- Planning of full load, part load and general cargo
- Planning of transport for all modes of transport
- Planning of single and multi-stage transports
- Modal and multimodal processing
- Planning based on a wide range of SAP document types (sales orders, deliveries, purchase orders, stock transfers and delivery schedules)
- Package simulation / package planning (also in conjunction with SAP EWM)
- Provision of optimisation procedures for determining transport legs, transport planning, route optimisation (last mile), loading space optimisation and service provider determination
- Integration into the neighbouring SAP modules (SAP ERP, SAP EWM, SAP YL, SAP GTS, SAP EHS)
- Role-based configuration of planning profiles
- Configuration of freight conditions and calculation profiles
- Two-stage credit note procedure (dispute management)
- Analysis and reporting

Over 300 successful installations of SAP logistics applications in 11 industries:

Chemistry & Pharma

Automotive

Fashion

Logistics service provider

Trade

Consumer goods

Food & Beverages

Industry & Production

Long-term customer relationships of over 20 years with up to 10 follow-up projects and over 10 different locations

Conclusion

Körber is a reliable partner that delivers the SAP solutions that fit your needs. We support our customers in all phases of their SAP logistics projects and ensure that everything runs smoothly: from consulting to implementation and support. Based on the SAP standard, we implement solutions that are nevertheless perfectly tailored to the needs of our customers.

We have many years of experience in implementing SAP solutions and are proud to have achieved SAP PartnerEdge Gold Partner status. This premium certification is only awarded to SAP partners who deliver first-class services and make their customers' business success their top priority.
