

# SAP YL

## Consulting and Implementation

### Top management and optimization of yard processes

Yard Logistics is a central piece for the efficient functioning of any supply chain, especially logistics operations. Even though Yard Logistics is not regarded as a “top of the mind” concept, the truth is that Yard Logistics has the power to make or break an entire operation.

Companies can go to great lengths to optimize their supply chain, but if the same attention and effort is not put into improving their yard logistics, then their operation will never be fully optimized.

### SAP Yard Logistics

SAP Yard Logistics is a powerful software solution for better management and optimization of all required tasks that take place in the yard, at plant and depot levels. These include yard digitalization, control of transports, increased process reliability, higher transparency and automation.

As a best-in-class solution, SAP YL allows companies to maximize their performance, improve the user experience and achieve higher efficiency. By combining SAP Yard Logistics with other SAP solutions, you will be creating a completely homogeneous systems landscape and harmonizing the entire supply chain.

This allows SAP YL to offer an intuitive user interface that provides plenty of benefits, including making the work easier for everyone in the yard, speeding up operations, dovetailing logistics and classic ERP functions, improving document flows and optimizing business processes.

A solution fit for all industries that is even more relevant, and a more logical choice, if a company already uses other SAP systems.

### The Case for SAP YL with Körber

We, at Körber, help our customers make the best out of SAP YL's service scope. We provide a holistic approach in all phases of a SAP YL project, enabling seamless integration of SAP YL with SAP S/4HANA and SAP ERM, and with all other applications in the SAP Supply Chain Logistics Suite, such as EWM, SAP TM and SAP LBN.

Whenever we start a new business partnership, we are in for the long run! And you can count on us to provide everything you need for SAP YL projects: from consulting, to implementation, to 24/7 support.

### SAP YL with Körber

---

#### High-level competence

based on several years of experience

#### End-to-end support and consulting

in all stages of the project

#### Successful implementation

of processes

#### Standard SAP YL extensions

add extra functionalities to the standard system

#### Independence

customers can make their own adjustments by customizing and developing their own resources

#### Methodological best-practices

for project execution and templates creation

**“Yard logistics synchronizes warehouses, transport processes and increases visibility for all involved employees. Customers immediately benefit from the increase in transparency and efficiency that results from digitizing these processes.”**

#### Olaf Moschkau

Sales Director for SAP Supply Chain Executing Solutions,  
Körber Supply Chain GmbH

## Over 300 SAP installations in a broad range of industries:

-  **Chemical & Pharmaceutical**
-  **Automotive**
-  **Fashion**
-  **Logistics Service Providers**
-  **Retail**
-  **Consumer Goods**
-  **Food & Beverage**
-  **Industrial and Manufacturing**
-  **Long-term customer relationships of over 20 years with up to 10 follow-up projects and over 10 different locations**

## What we can do for you

### Intuitive user interface

Easy-to-use displays with real-time information of planned and unplanned movements

### Easy integration

Seamless and fast integration with other SAP Supply Chain Logistics Suite solutions

### Full transparency

Provided by full data availability in a single system environment

### Homogeneous system landscape

Developed for companies using SAP S/4HANA or SAP ERP to simplify interfaces and optimize processes

### Reliability & Security

The software is ready for all requirements, including performing at large depots

### State-of-the-art technology

Use of modern and flexible user interfaces such as SAP Fiori and SAPUI5

## Conclusion

Körber is a reliable partner that always delivers the right SAP solution on time. We are alongside our customers in all stages of SAP YL projects, making sure that everything runs smoothly: from consulting to the implementation phase. In addition to standard SAP software, Körber also offers customized solutions that are optimally adapted to each customer's needs.

With several years of experience implementing SAP solutions, we are proud to have been granted the status of SAP PartnerEdge Gold Partner. This recognition is awarded to those partners that perform at a high level across their organization and illustrate a strong commitment to delivering business value to SAP's customers.
